

I was told I was signing up for Verizon service and was signed up with MCI Worldcom who is subletting service from Verizon. I hate MCI's service, but now everyone has my cell number and it would be very hard to notify all my friends, family, and customers, as well as change my business cards. I plead for phone number portability, I feel that I am being held hostage by a very inferior provider. Please do something to help the consumers and force the companies like MCI to improve their services or risk losing irate customers. Thank you.
